Front End Web Developer

SUMMARY

As a tech-savvy front-end web developer, I have always had a strong gravitational pull towards technology.

With extensive experience in MS SQL and Oracle (T-SQL) database code development, now a Front Web Development Certificate at Trilogy Education Services from London, I am gaining much-needed experience in web development fundamentals while improving my skills in ES6 and Node.js, React State and Deployment, HTML5, CCS, Bootstrap and JavaScript, jQuery, and APIs (Server / Web / Third-Party).

I am always striving to improve my skills and knowledge base. I consider communication and collaboration to be fundamental parts of teamwork.

I intend to create and maintain websites, in addition to developing applications for iOS and Android.

I seek to bring my attention to detail and technical skills to a business to grow and become a valuable asset.
